

WHAT?

African countries have been opening their borders since the start of September. We are calling for your help to put pressure on Foreign Commonwealth & Development Office and Public Health England to apply the same foreign office travel metrics to African countries that are applied for the rest of the world.

This will lead to air bridges being created to countries that you can travel safely to in times of Covid.

Africa has some of the lowest Covid numbers in the world and yet the FCDO is advising against all travel to Africa.

OPEN

African Travel

THE CRISIS

Humanitarian

The continent relies heavily on international travel for £130bn income and 25m jobs. Each African travel job typically supports 8-10 dependents, helping to support up to 250m people

Wildlife

More eyes on the ground in Africa reduces poaching of rhino, elephant and pangolin and subsistence killing of animals for bush meat.

UK Economy

Help protect UK and African jobs across tour operators, travel agents, tourist boards, airlines, marketing & PR companies and related support industries.

ACT NOW
